

OCCUPATIONAL HEALTH AND SAFETY SERVICES

Management concerns over the presence of hazardous conditions must be addressed by qualified experts to ensure healthy and healthy work environments. APTIM offers a wide range of client-oriented occupational health and safety services to design, implement, and assess workplace programs.

RECOGNITION, EVALUATION, AND CONTROL

The recognition, evaluation, and control of occupational risks associated with complex industrial processes, materials handling, and hazardous substance use play an integral role in reducing both personal and corporate risks and liabilities, including:

- ▶ Occupational injury and illness
- ▶ Workers' compensation costs
- ▶ Regulatory compliance

Our certified industrial hygienists, certified safety professionals, and other senior-level health and safety professionals provide support throughout the design, implementation, and assessment of workplace safety programs.

DIVERSE SERVICES

- ▶ Asbestos surveys, assessments, and consultation
- ▶ Confined space identification and assessment
- ▶ Emergency action plans
- ▶ Engineering and administrative controls and performance evaluations
- ▶ Expert witness testimony
- ▶ Fall protection assessment
- ▶ Fire prevention and protection planning
- ▶ Hazard communication programs and training
- ▶ Hazardous materials storage and handling
- ▶ Health and safety program audits
- ▶ Health physics and radiation support
