

# How E-Bike Rebate Programs Work: From Program Design to Delivery with APTIM

## 1. PROGRAM PLANNING & DESIGN

### Smart Planning Made Simple

APTIM starts with a clear, community-first plan—using local mobility data and climate goals to shape eligibility, outreach, and funding strategies. We help agencies follow grant rules and make sure everyone can participate from the start.

Discover how APTIM customizes rebate programs for real-world success. Speak with a program expert at APTIM.

## 2. OUTREACH & RETAILER ENGAGEMENT

### Outreach That Builds Trust

We use ZIP-code data and local insights to reach underserved communities with multilingual campaigns and trusted partners. APTIM also recruits nearby retailers to make rebate redemption easy and accessible.

## 3. APPLICATION & VERIFICATION

### Easy, Secure Applications

Our mobile-friendly portal makes applying simple. Built-in tools verify documents and eligibility, while agencies get real-time tracking—all in one secure system.

## 4. VOUCHER DISTRIBUTION

### Fast, Flexible Voucher Distribution

Rebates are issued through multiple channels—from digital to mailed checks—based on applicant preference and community access. Real-time dashboards help agencies monitor performance, while residents receive timely support every step of the way.

## 5. COMMUNITY OUTCOMES

### Real Impact, Right Where It's Needed

APTIM's programs help more people get access to clean transportation, support local jobs, and reduce emissions in the neighborhoods that need it most. We track results by ZIP code so agencies can show real progress in their communities and on climate goals.
